

BUSINESS POLICY

Sejfo Group will be a leading provider of automation and IT-solutions to customers, primarily in the fields of vehicle, energy, and pharmaceutical industries.

We will strive to meet our customers and employees expectations of high technology and quality, as well as to achieve timely precision delivery

To minimize our environmental impact, have a healthy working environment and a strong commitment from management and employees, will be a matter of course to us.

We shall comply with the policy by:

- Achieving customer requirements for deliveries with right technology, quality, and on time;
- Identifying, planning, controlling, monitoring, and completing all activities in our projects;
- Maintaining an open and clear dialogue with customers, suppliers, employees and other stakeholders in improving and preventive purposes;
- Following the laws and other requirements that apply;
- Continuously striving to improve our skills, our working methods and processes to achieve our goals;
- Working to prevent pollution and incidents, as well as striving to choose the best options from an environmental point of view;
- Systematically identifying potential sources of ill health and accidents that they can be eliminated to create a safe and healthy workplace
